## Projects

### Employee Management Dashboard

- Developed a dynamic Employee Management Dashboard using React, featuring real-time updates for employees, departments, and positions.
- Implemented CRUD functionality, including adding, editing, and deleting employees with reusable components.
- Designed a responsive and visually appealing interface using CSS and integrated modern tools like Vite for optimized development.

### Ditoy Baguio

- Designed a travel planning website that combines API driven weather forecasting, destination discovery, and booking functionalities.
- Proposed to help travelers seamlessly plan their trips by providing real-time weather updates for chosen destinations, browsing through popular attractions, and booking accommodations and flights.
